ABOUT \$PYRO

YOU WONT FIND ANY REASON TO NOT LOVE US.

\$PYRO is a fast-burning hyper-deflationary token that gains value with every buy and sell transaction. The burns will be a true burn (and not a fake dead wallet burn) and actually remove the tokens from the total supply with every buy/sell transaction. Since the initial supply of \$PYRO is limited the floor price will continue to rise as more and more PYRO tokens are removed from circulation.

The project has developed a burn bot for hire by other projects. If a developer or future project wants to have a guaranteed fully functional burner contract they will need to use our custom burns \$PYRO contract with 2% going to \$PYRO from all their future buy/sell transactions pushing the price of PYRO up even further alongside our burn bot with \$PYRO ad-placements.

02

THE **\$PYRO** BURN NEVER STOPS

The team behind \$PYRO has strategically planned and designed tokenomics in a way that will keep burning \$PYRO tokens forever on the blockchain. We call this strategy the “\$PYRO burn principle”, and the flames will continue to burn forever.

As the number of \$PYRO tokens continues to fall due to the burns a phenomenon called the gamma squeeze is expected to occur, resulting in a \$PYRO supply shock, this phenomenon will rapidly increase the price of each individual \$PYRO due to scarcity as the total supply rapidly diminishes.

Join the fastest burning token on ERC20 and watch the \$PYRO flames burn for eternity.

HOT NEW UTILITY FOR TELEGRAM

04

If you have been in the DEFI space over the past few months you have seen bots like “bobby buy bot” and “bubble buy bot” flooding Telegram chats when buys come into the project. These bots do a great job of creating hype within the community and keeping the investors engaged. We plan to enter this space with a complementary bot that will help go alongside the buy bots within the telegram chats and multiply the hype and engagement even more...

Instead of a buy bot, we have introduced a burn bot PYRO-bot, that will show how many tokens are burned with every transaction as they happen one by one. Think about how this could keep strong engagement, and build communities in this space. These bot posts are easily shareable amongst communities, and it will keep people aware of just how valuable, and scarce these tokens will become over time!

The utility doesn't stop with the burn bot... We plan to heat it up with another utility that could benefit other projects as well along the way, so

\$PYRO NFT

Where anything is possible and all are welcome.
Experience an Open Digital Universe, Unlock Self
Expression, & Open New Worlds on Pyromatic. Now You
Can Buy, Sell, \$PYRO NFTs

You can also stake \$PYRO NFTs on our staking
platform to earn extra rewards in \$PYRO tokens.

STAKING

06

\$PYRO is a fast-burning hyper-deflationary token that gains value with every buy and sell transaction. The burns will be a true burn (and not a fake dead wallet burn) and actually remove the tokens from the total supply with every buy/sell transaction.

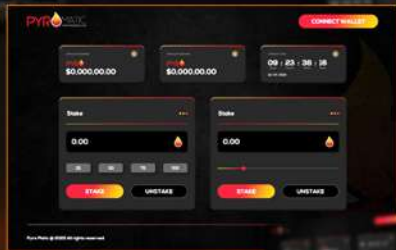

Pyro has launched Staking as an utility for their loyal investors. Just stake your \$PYRO tokens to earn more \$PYRO

APR: 20%

Deposit fee: .05% of your holding that are to be staked

Min lock period: 30 days

Early withdrawal Penalty: 50%

07

TOKENOMICS

There is a 6% tax on every Buy and sell transaction.

6% BUY BURN

\$PYRO will burn 6% of each buy automatically. This isn't really a tax because the value of each \$PYRO increases with every burn.

6% SELL BURN

\$PYRO will burn 6% of each sell automatically. This isn't really a tax because the value of each unsold \$PYRO increases with every burn.

12% TOTAL BURN

\$PYRO will burn 12% of all \$PYRO from both buys and sells increasing the value of each \$PYRO token, and continually raising the floor price.

\$PYRO Slippage: Set slippage at 7-15% (so no MEV bots can sandwich you).

TOTAL SUPPLY : 1,000,000

ROADMAP (2022)

To ensure that our project runs properly and everything is on time, we have strategically designed our roadmap to make sure success of our project

PHASE 1

- SOCIAL MEDIA SETUP
- PYRO LAUNCH
- PYRO BURN BOT
- PROMOTIONS

PHASE 2

- UTILITY REVEAL
- PARTNERSHIPS
- MORE PROMOTIONS
- NEW WEBSITE
- CG & CMC
- BRANDING UPGRADE

PHASE 3

- MERCHANDISE
- EXCHANGE LISTING
- NFT'S TO HOLDERS
- MORE PROMOTIONS
- MORE UTILITIES
- ROADMAP EXTENSION
